TECHNOLOGY

NEVERFLAT

The Spalding Neverflat basketball holds air 10 times longer than traditional basketballs resulting in consistent rebound height for at least 1 year. Guaranteed.

- Exclusive patented NitroFlate® Technology
- Special valve prevents air seepage
- Excellent grip and ball control

GRIP CONTROL

INDOOR/OUTDOOR

Because of its high-end composite surface and the higher pebble design this ball has a superior grip as well as a new and improved touch.

SOFT GRIP TECHNOLOGY

The new developed, two layer sponge rubber design gives a soft grip, perfect game characteristics and a very long durability in category of outdoor balls.

ROOKIE GEAR TECHNOLOGY

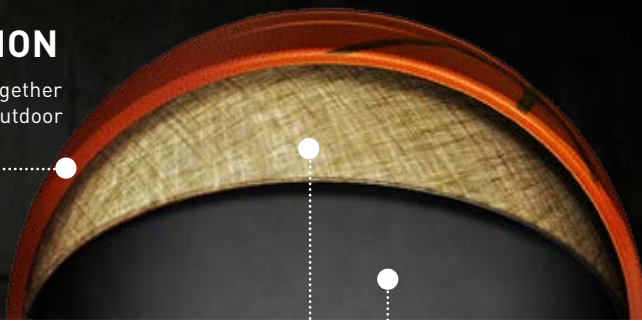

Spalding Rookie Gear provides a lighter ball, for a better experience. Spalding Rookie Gear is designed to weigh less than standard youth balls for kids until 8 years. A lighter ball creates a better experience for kids, allowing them to practice proper fundamentals more easily and build the confidence they need with a ball that is appropriate in size and weight. Watch as your young athlete learns faster and performs better than ever before.

- Weighs 15% lighter than traditional balls
- Premium Soft Grip Technology Cover

MOLDED BASKETBALL CONSTRUCTION

A type of basketball where the entire outer surface is produced together with the molding of the carcass. This technique is used with our outdoor basketballs.

CARCASS and COVER Provides structure for the inner components. With high-end rubber balls, a coat of paint is applied to enhance a better grip and look.

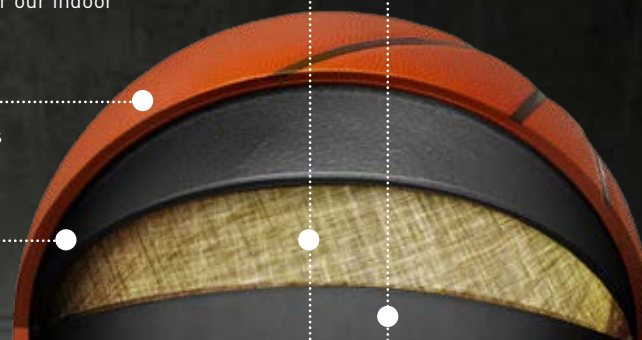

LAMINATED BASKETBALL CONSTRUCTION

A type of basketball where panels of leather, composite leather or synthetics are fixed onto a rubber carcass by hand. This technique is used for our indoor and indoor/outdoor basketballs.

COVER provides good grip, feel and aesthetic appeal to the ball as well as necessary strength and abrasion resistance.

CARCASS provides structure for the inner components.

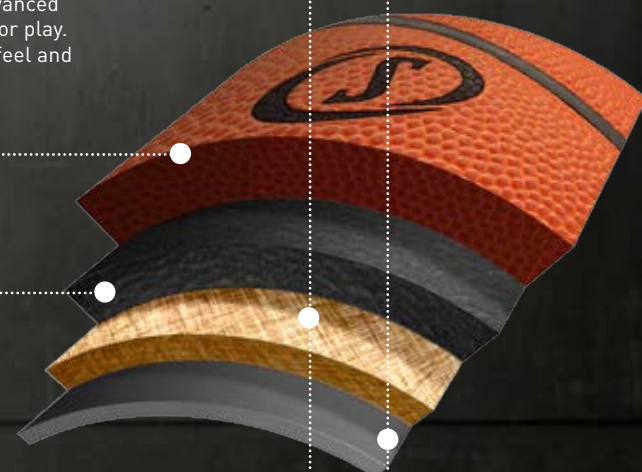

LEGACY

New ZK Material: This newly designed exclusive material with advanced moisture management control is engineered for high caliber indoor play. The soft carcass and deep channel design gives this ball a softer feel and improved grip.

The **COVER** material provides superior grip and soft feel while maintaining Spalding's rigorous standards for material strength and abrasion resistance.

The **CARCASS** provides structure, shape and protection for the inner components.

WINDINGS

Nylon windings add structural integrity and durability to the ball.

BLADDER

High-end butyl bladder that maintains air pressure.
